

WORKSHOP: MASP Professional Development

AM: Review of DSM5 and Implications for School Psychologists

Changes to the criteria for 'Autism Spectrum Disorder' have perhaps been the most controversial of the changes in DSM5. This presentation will cover the controversy, the research basis, emerging concerns, and application considerations for ASD. In addition, changes and considerations for the Neurodevelopmental Disorders Cluster (including Learning Disabilities, ADHD, Intellectual Disability, etc.) will be highlighted.

PM: Round Table Discussions

Current issues that are of concern to practitioners will be reviewed. This includes updates on possible changes to the regulation of Psychology in Manitoba; professional learning options; proposed book club. Suggestions for topics can also be posted on the MASP members' forum.
