

WORKSHOP: Research-based Approaches to Specific Learning Disability Identification & Intervention

This workshop will present the latest research on specific learning disabilities (SLD) in reading, mathematics, writing, and oral language, which provides the foundation for alternative research-based methods or “third-method” approaches to SLD identification (school age). One third-method approach will be described in detail—the Cattell-Horn-Carroll–based operational definition of SLD. This method may be used within the context of an RTI service-delivery model and incorporates multiple data sources and methods for SLD determination. Through case study presentations, participants will learn how to identify individuals with SLD using current theory, research, and methods, with an emphasis on linking assessment findings to evidence-based educational strategies and interventions.

Presenter Bio

Dawn P. Flanagan, PhD, is Professor of Psychology and Director of the School of psychology Training Programs at St. John’s University in NY, and Clinical Assistant Professor at the Yale Child Study Center. She is the author or coauthor of several popular books in the Essentials series, including *Essentials of WJIII Cognitive Abilities Assessment*, *Essentials of Cross-Battery Assessment*, and *Essentials of WISC-IV Assessment, Second Edition*.
